Education

University of Florida (UF)

Aug. 2023 – May 2027

Bachelor of Science in Computer Engineering & Bachelor of Arts in Economics

GPA: 3.94/4.0

Certificates in Engineering Project Management & Econometric and Data Analysis

Skills

Languages: Python, C++, Java, JavaScript, TypeScript, Swift, SQL, R, MATLAB, SystemVerilog, Assembly, HTML/CSS

Frameworks: FastAPI, Flask, Spring, React, React Native, Next.js, Express.js, Node.js, Bootstrap, SwiftUI

Developer Tools: Git, Docker, Kubernetes, Kafka, MySQL, AWS, GCP, Azure, MongoDB, Jenkins, Bazel, Jira, Figma

AI/ML: Model Context Protocol (MCP), OpenCV, PyTorch, TensorFlow, Scikit-learn, NumPy, pandas, Claude Code

Experience

Security Software Engineering Intern | Intuit Inc.

May 2026 – Aug. 2026

- Architected an AI-powered identity lookup platform (**MCP, Python, FastAPI, Spring Boot**) enabling 20+ investigators to query linked accounts and fraud history across 6 products, cutting investigation time by 97% and saving 200+ hours weekly
- Engineered an account-linking pipeline (**Numaflow, EventBus, DynamoDB, Docker**) that automatically processes 5,000+ weekly sanctions alerts, keeping customer identity connections current as new events stream across partner systems
- Collaborated with cross functional teams to obtain sensitive-data access, enabling compliant production deployment

Teaching Assistant | University of Florida

Aug. 2024 – Present

Data Structures and Algorithms & Digital Logic and Computer Systems & Computer Organization & Programming Fundamentals

- Instructed 100+ students across sections, achieved 100% completion of **C++** programming challenges and hardware labs
- Coordinated 8+ weekly office hours to offer code reviews and debugging support; boosted exam averages by 22%
- Developed course content (30+ assignments, 15 hardware demos, 6 exams, and automated testing suite) for 1200+ students

Software Engineering Fellow | Uber Technologies Inc.

Feb. 2025 – Aug. 2025

- Selected for Uber Career Prep Fellowship (2.3% acceptance rate) by demonstrating data structures and algorithms skills
- Accelerated algorithmic proficiency by working with Uber engineers 1:1 to solve 70+ technical interview problems

Product Management Intern | M_Service

May 2025 – Aug. 2025

- Spearheaded end-to-end development of an automation tool on MoMo's digital lending platform (40M+ users), enforced builds with Bazel and CI/CD with Jenkins, cutting lending rule deployment by 80% and reducing manual errors by 70%
- Analyzed user behavior data from 2M+ transactions using **BigQuery/SQL** and A/B testing to prioritize 5 key features, accelerating feature delivery by 15% and improving 30-day retention rate by 32%
- Facilitated Scrum ceremonies and tracked scope in **Jira/Confluence** to launch mobile-web parity features across 3 platforms

Product Management Intern | Nami Technology

Jun. 2024 – Aug. 2024

- Spearheaded the development of an NLP conversation-analysis tool (**scikit-learn, pandas**) with a **Flask REST API** and **DynamoDB** storage for customer service, adopted by 3 enterprise clients and reduced ticket resolution time by 38%
- Identified 10+ critical usability issues in client's digital retail management systems by utilizing market research, SWOT analysis, and usability testing, reducing client onboarding time by 24% and lifting customers' satisfaction scores by 18%
- Redesigned UI/UX prototypes using Figma with user-centered design and A/B testing, driving 36% increase in active users

Projects

transPEAKtation | Software Engineer & Team Lead | 1st Place, ShellHacks

Sep. 2026 – Present

- Architected a full-stack event-aware routing platform (**Python, FastAPI, Next.js, PyTorch**) across a 4-person team, unifying live traffic and event data from 6+ sources (**MongoDB, Tiger Data**) to re-rank routes before congestion forms
- Engineered a 372K-parameter transformer forecasting travel time across 26,400+ road segments, cutting error by 33%, and a PPO load-balancing service that cut riders' trip time up to 59% in SUMO simulation of a 7,000-vehicle exodus event

ChompCourse | Software Engineer & Product Lead | WiCSE Design Team

Aug. 2024 – May 2025

- Engineered a full-stack app with **Flask, React, Firebase, Expo** that produces personalized, semester-by-semester course roadmaps tailored to each student's major, interests, and preferences for 100+ test users through iterative releases
- Automated UF course catalog scraping with Selenium, keeping 1,000+ course entries up to date with prerequisite graphing

SET Dumpy | Electrical Engineer & Product Lead | SASE Engineering Team

Aug. 2023 – May 2024

- Collaborated with a 27-person team to build a trash-detecting robot (**Python/OpenCV**), achieved 90% navigation accuracy
- Integrated Arduino microprocessors, LiDAR sensor, linear actuators, and motors; tuned control loops for 88% grasp success

Leadership

Director of Professional Development | UF Product Space

Jun. 2025 – Present

- Spearheaded 6 workshops for 100+ members on product management skillset, developed tailored training resources
- Coordinated a product management fellowship matching 40+ fellows with 6 local startups; organized project scoping, matching, and sponsor check-ins across 8-week sprints; delivered 14 company-approved projects with 100% completion
